

DIAMOND PROFESSIONAL

Diamond Brite Wheel Cleaner

Technical Bulletin - DP214

Features:

- ◆ Ready-to-Use, Pleasant Scent
- ◆ Quickly Removes Road Grime
- ◆ Leaves Wheels Exceptionally Bright
- ◆ Non-Alkaline, Paint Safe, Rinses Film-Free

Product Description:

Diamond Brite is a purple, non-alkaline, ready-to-use, spray-on/rinse-off wheel cleaner. Diamond Brite is tough on brake dust, grease and road grime and rinses off easily after application. Diamond Brite contains metal brighteners specifically designed to clean and brighten coated aluminum, painted and spoke wheels to leave them with a bright showroom shine.

Product Benefits:

Diamond Brite does not need extended dwell time to be effective and is less likely to cause bronchial irritation often related to other wheel cleaners. It is safe to use on wheels and is excellent at increasing the shine and appeal of all coated wheels. Diamond Brite is safe and effective when used on plastic and painted surfaces found in underbody and suspension areas. Also deep cleans textured plastic surfaces such as truck and SUV running boards, dock bumpers, trim and fascia.

Directions:

Apply Diamond Brite to cool surfaces only, then rinse well. Always test non-factory wheels or wheels that may not be coated in a small inconspicuous area (i.e. the backside) before use. Dispense Diamond Brite with a quality, detail spray bottle. Dilute 6:1 for regular maintenance. Do NOT use on glass, polished or anodized aluminum surfaces.

Packaging:

Quarts
Gallons
5 Gallons
Drums
