

DIAMOND PROFESSIONAL

Cleaner Wax

Technical Bulletin - DP235

Features:

- ◆ Easily removes oxidation, surface contaminants, swirl and scuff marks
- ◆ Dries virtually clear
- ◆ Restores original luster and gloss
- ◆ Durable long-lasting layer of protection against the elements
- ◆ Helps restore scratched and yellowed acrylic headlight lenses
- ◆ Low dust, easy clean up

Product Description:

Cleaner Wax enhances, protects and restores luster and original depth of image to aged, original or re-painted finishes. Cleaner Wax removes light scratches, swirl marks and imperfections and produces a brilliant, lasting shine.

Product Benefits:

Cleaner Wax will often remove surface imperfections eliminating the need to use conventional rubbing compounds. Cleaner Wax restores lightly scuffed and scratched finishes easily while removing swirl marks from fully cured paint finishes. Cleaner Wax dries virtually clear requiring less detail and clean-up time.

Directions:

Prior to application; make sure the vehicle's surface is clean, dry and cool. Squeeze a moderate amount of Cleaner Wax onto a foam applicator or orbital buffer. Apply Cleaner Wax with a 50% overlap in a straight line application, rotating the pad as you apply. Allow product to dry to a light haze. Use a cotton or microfiber towel to remove haze, flipping the towel often, wiping until a brilliant shine is achieved.

Packaging:

Quarts
